

Smile Village Dental Care Infection Control Upgrades

- Daily staff screening
- Patient phone screenings
- Temperatures are taken at the door via touchless thermometer.
- Sneeze shields at the front desk
- Air purifiers are in each operatory and throughout the office.
- All surfaces are sprayed and wiped down after use.
- Each room is mopped with Clorox, and the air is sprayed after each patient. The air purifier is then turned on, and the room is allowed one hour of sterilization between patients.
- AC filters have been upgraded with bactericidal and virucidal filters.
- Touchless hand sanitizers are available at check-in and checkout.
- Patients who arrive without a mask will be provided with one.
- Our waiting room is closed. We ask that all patients call from their vehicles before entering the office. Patients will be greeted at the door to have their temperatures taken before being escorted directly to a room.
